These applicants have been found to meet the fitness requirement in like manner to section 6 of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64, and the provincial transport board for Ontario proposes to issue the licences unless a person, within thirty days of this publication, serves on the Applicant and files with the Registrar of Motor Vehicles with the prescribed filing fee, a written request for a fitness hearing or a public interest test in like manner to Subsection 7(4) of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64.

NOTE: A person who requests a public interest hearing must, within thirty-nine days of this publication, serve on the Ontario Highway Transport Board a document that makes out a written case to the Board that the granting of the operating authority applied for would be likely to have a significant detrimental effect on the public interest using the criteria set out in subsection 10(1) of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64, and that the request is not frivolously made.

MOTOR VEHICLE TRANSPORT ACT, 1987

INTRA-PROVINCIAL TRUCK APPLICATIONS:

The following are applications for operating licences under Part III of the Motor Vehicle Transport Act, 1987, S.C. 1987, Chapter 35. These applicants have been found to meet the fitness requirement in like manner to section 6 of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64, and the provincial transport board for Ontario proposes to issue the licences unless a person, within thirty days of this publication, serves on the Applicant and files with the Registrar of Motor Vehicles with the prescribed filing fee, a written request for a fitness hearing or a public interest test in like manner to Subsection 7(4) of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64.

NOTE: A person who requests a public interest hearing must, within thirty-nine days of this publication, serve on the Ontario Highway Transport Board a document that makes out a written case to the Board that the granting of the operating authority applied for would be likely to have a significant detrimental effect on the public interest using the criteria set out in subsection 10(1) of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64, and that the request is not frivolously made.

* Indicates a person who has applied for licences under both Part II and Part III of the Motor Vehicle Transport Act, 1987.

ENVIRONMENTAL ASSESSMENT ACT

O. Reg. 371/89.

Exemption—Ministry of Northern

Development and Mines—MNDM-1/2.

Made—June 12th, 1989.

Approved—June 12th, 1989.

Filed—June 23rd, 1989.

ORDER MADE UNDER THE
ENVIRONMENTAL ASSESSMENT ACTEXEMPTION—MINISTRY OF NORTHERN
DEVELOPMENT AND MINES—MNDM-1/2

Having received a request from the Ministry of Northern Development and Mines that undertakings, namely,

- (i) the activities of planning, designing, constructing, operating and maintaining a new access road and upgrading existing roads for approximately 14 kilometres on Crown land, known as the Goudreau-Lochalsh Road, to provide a road link between Dubreuilville and a point in Finan Township between Canamax and Magino mine sites; and
- (ii) the completion of construction and the operations, maintenance and retirement activities associated with mineral resource access roads which the Ministry of Northern Development and Mines (MNDM) or its predecessors commenced constructing prior to the date of this order,

be exempt from the application of the Act pursuant to section 29; and

Having been advised by the Minister of Northern Development and Mines that if the undertaking is subject to the application of the Act, the following injury, damage or interference with the persons and property indicated will occur:

- A. The economic hardship experienced by the Wawa-Dubreuilville area will be prolonged and will result in unnecessary costs to the Province in the form of social assistance and subsidies.
- B. MNDM will incur unnecessary costs with respect to (ii) above if it is required to prepare environmental assessments for a number of relatively minor undertakings.

Having weighed such injury, damage or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

- A. The Wawa-Dubreuilville area is suffering economic hardship; construction of Goudreau-Lochalsh Road will provide more direct access to the gold resource in Finan Township and help to increase employment levels in the area;
- B. Significant negative environmental effects are not expected to occur as a result of these undertakings.
- C. There is an existing approved planning process in place (MNR's Class EA for "Access Roads to MNR Facilities") which is a suitable planning process for these undertakings.
- D. This order replaces Exemption Order MNDM-1, filed as Ontario Regulation No. 284/88 with respect to the Goudreau-Lochalsh Road, under which conditions 1 to 6 below have already been completed, in order to permit an extended period in which the road may be constructed.
- E. MNDM is currently preparing a Class Environmental Assessment for Access Roads which will fulfil their requirements for planning access roads under the *Environmental Assessment Act* for any subsequent roads for which they may be proponents.

This exemption is subject to the following terms and conditions:

1. The MNDM shall adapt the planning procedures set out in the Ministry of Natural Resources' Class EA for "Access Roads to MNR Facilities" as approved, during the development of the Goudreau-Lochalsh Road.
2. The MNDM shall consult the public and government agencies during various stages of planning the Goudreau-Lochalsh Road as stated in the above-noted Class EA.
3. The public and government agencies shall have a minimum of thirty days to review the Goudreau-Lochalsh Road project proposal and to submit comments and concerns to the MNDM.
4. Prior to the Goudreau-Lochalsh Road project approval by MNDM, the Ministry shall notify the public and government agencies of its decision to proceed and of the outcome of the consultation process.
5. Following notification of the Ministry of Northern Development and Mines' intent to

proceed with the Goudreau-Lochalsh Road, the public and government agencies shall have fifteen days to submit any comments and/or concerns to the MNDM. In turn, the MNDM shall send copies of those comments and/or concerns and how they have been addressed to the Director of the Environmental Assessment Branch.

6. Prior to carrying out any construction activity pursuant to undertaking (i) of this Exemption Order, an Environmental Status Report (ESR) outlining the planning, design and construction of work proposed to be undertaken will be completed. The ESR shall be completed to outline the environmental effects of planning, design and construction and the proposed mitigation of these effects. The ESR shall be filed at least thirty days prior to the commencement of construction by the Minister of Northern Development and Mines with the Director of the Environmental Assessment Branch of the Ministry of the Environment for filing with the public records kept under section 31 of the Act by the Branch.
7. The MNDM shall ensure that the construction, maintenance and operation of the Goudreau-Lochalsh Road is carried out as set out in the Environmental Status Report filed under condition 6.

MOTOR VEHICLE TRANSPORT ACT, 1987

MOTOR VEHICLE TRANSPORT ACT, 1987, PART II TRUCK APPLICATIONS:

The following are applications for extra-provincial truck transport operating licences under Part II of the Motor Vehicle Transport Act, 1987, S.C. 1987, Chapter 35. These Applicants have been found to meet the fitness requirements pursuant to Section 8(2) of that Act and the provincial transport board for Ontario proposes to issue the licences if no objection is served on the Applicant and filed with the Registrar of Motor Vehicles with the prescribed filing fee, within twenty-nine days of this publication.

EXTRA-PROVINCIAL APPLICATIONS:

NOTE: Where the application is for a licence other than a corridor operating authority, an interested person who serves and files an objection must also provide the Ontario Highway Transport Board with written evidence, within thirty-nine days of this publication that satisfies that Board that, in the absence of evidence to the contrary, the operation of the undertaking in respect of which the licence is sought would likely be detrimental to the public interest.

* Indicates a person who has applied for licences under both Part II and Part III of the Motor Vehicle Transport Act, 1987.

INTRA-PROVINCIAL TRUCK APPLICATIONS:

The following are applications for operating licences under Part III of the Motor Vehicle Transport Act, 1987, S.C. 1987, Chapter 35. These applicants have been found to meet the fitness requirement in like manner to section 6 of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64, and the provincial transport board for Ontario proposes to issue the licences unless a person, within thirty days of this publication, serves on the Applicant and files with the Registrar of Motor Vehicles with the prescribed filing fee, a written request for a fitness hearing or a public interest test in like manner to Subsection 7(4) of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64.

NOTE: A person who requests a public interest hearing must, within thirty-nine days of this publication, serve on the Ontario Highway Transport Board a document that makes out a written case to the Board that the granting of the operating authority applied for would be likely to have a significant

detrimental effect on the public interest using the criteria set out in subsection 10(1) of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64, and that the request is not frivolously made.

* Indicates a person who has applied for licences under both Part II and Part III of the Motor Vehicle Transport Act, 1987.

ENVIRONMENTAL ASSESSMENT ACT

O. Reg. 392/89.

Exemption—Ontario Hydro—OH-34.

Made—May 19th, 1989.

Approved—May 19th, 1989.

Filed—June 30th, 1989.

ORDER MADE UNDER THE
ENVIRONMENTAL ASSESSMENT ACT

EXEMPTION—ONTARIO HYDRO—OH-34

Having received a request from Ontario Hydro that an undertaking, namely:

all activities relating to the provision of electrical services in remote communities to meet community electricity needs and emergency situations (including the activities of planning, acquisition, design, construction, operation, maintenance, modification, relocation and retirement of electricity generating stations and associated facilities as described in condition 2),

be exempt from the application of the Act pursuant to section 29, and

Having been advised that if the undertaking is subject to the application of the Act, the following injury, damage or interference with the persons and property indicated will occur:

A. The public will be interfered with by the delay in installing:

- (i) generating capacity which is required to provide and maintain an adequate, reliable and economic source of power supply to remote communities, and where appropriate,
- (ii) heat recovery systems which will enhance the efficient use of energy and/or displace the use of more expensive, non-renewable fuels.

Having weighed such injury, damage or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

A. Ontario Hydro has demonstrated that remote community energy supply projects

provide a service which has significant social and economic benefits to the communities with minimal disruption to the environment, as shown by the development of projects under Exemption Order OH-33, published in *The Ontario Gazette* on February 1, 1986. Therefore, the interference with the delivery of Ontario Hydro generation and associated facilities, including heat recovery systems, which would be caused by the preparation and approval of individual environmental assessments for these projects would be undue on these remote communities.

- B. New remote community energy supply projects are only carried out in response to requests from government agencies and the affected community.
- C. Ontario Hydro has prepared a supporting document, Remote Community Energy Supply-Procedural Document, for this Exemption Order and will follow the environmental planning process described in this document for each project initiated under this Order.
- D. The nature of the projects, the scale of the remote community energy supply program and the "bump-up" provision in the planning process which allows specific projects to be designated under the Act, will ensure the protection, conservation and wise management in Ontario of the environment.
- E. Affected agencies and parties (listed in the Procedural Document) have been informed and consulted about this undertaking and the Procedural Document and no objections have been raised.

This exemption is subject to the following conditions:

1. Ontario Hydro shall carry out this undertaking according to the conditions outlined in this Exemption Order and the procedures described in the Remote Community Energy Supply—Procedural Document.
2. The undertaking involves remote community energy supply projects, including the following activities:

2.1 *Planning, Design, Property Acquisition, Construction, Modification and Relocation*

- (a) Planning, design, property acquisition, construction and modification of new and existing electricity generating stations and new and existing associated facilities in remote communities;

- (b) Relocation of existing electricity generation facilities, as required.

2.2 Operation and Maintenance

- (a) Acquisition of existing electricity generation facilities, such as facilities which have been constructed by others.
- (b) Operational and maintenance activities to ensure proper operating order, safe and effective working conditions and efficient energy production of all facilities.
- (c) Operation and maintenance of electricity generation facilities which were originally constructed for demonstration or research purposes.
- (d) Temporary removal of electricity generation facilities from service.

2.3 Retirement

- (a) Retirement activities, such as the permanent removal of electricity generation facilities from service, or the disposition of assets by Ontario Hydro.

3. Definition of Terms

For the purposes of this Exemption Order, the following definitions of terms apply:

- (a) *Remote Communities* refers to communities which must be supplied with dedicated or isolated generation because it is impractical to incorporate them into Ontario Hydro's electrical and transmission/distribution grid.
- (b) *Electricity Generation Facilities* include electricity generating stations and associated facilities.
- (c) *Associated Facilities* are those facilities necessary to service electricity generating stations, such as:
 - (i) fuel storage facilities and distribution systems to transfer fuel from the point of delivery to the storage site and the generating station;
 - (ii) heat recovery systems to recover by-product heat energy from diesel generators, other generators and turbines and associated delivery systems to

distribute recovered energy from the generating station to the users;

- (iii) on-site maintenance and construction buildings and staff residences;

- (iv) access roads, such as roads to connect the electricity generation facilities with the affected community, airport, existing roads or railway lines.

- (d) *Modification* involves the extension, replacement, improvement, reconstruction, upgrading or change in capacity of electricity generation facilities.

- (e) *Emergency Situation* refers to the occurrence of a disaster or an unexpected sudden event requiring immediate action.

- (f) *Retirement Activities* may include:

- (i) permanent removal of electricity generation facilities, such as dismantling, removing or salvaging some or all of these facilities, or preserving them for later action;

- (ii) disposition of the asset by Ontario Hydro (e.g. selling electricity generation facilities).

- 4. When activities associated with this undertaking involve electrical distribution facilities, Ontario Hydro will consult with all affected parties and agencies regarding the location, environmental effects and the mitigation measures required.
- 5. Where a project which otherwise would be exempt under this Order is being carried out as or is part of an undertaking for which an environmental assessment has been accepted and approval to proceed received, the project shall be carried out in accordance with any terms or conditions in the approval to proceed, and the provisions of this Order shall be deemed not to apply to the project.
- 6. Where a project which is the subject of this Order is being carried out as or is part of another undertaking which is the subject of an exemption order under the Act, the project exempt under this Order shall be carried out in accordance with any terms or conditions in the other exemption order as well as the conditions in this Order. In the event of any conflict between the terms and conditions in the exemption orders, the provisions of this Order shall govern.
- 7. This Exemption Order replaces Exemption Order OH-33, which is hereby revoked.

8. Except on projects where construction commences prior to the latter of the following dates, no further work shall be done pursuant to this Exemption Order after:

- (a) five years from the approval date of this Exemption Order, or
- (b) such later date as the Minister of the Environment may specify by notice in writing to the proponent and published in *The Ontario Gazette*.

Made—June 23rd, 1989.

Approved—June 23rd, 1989.

Filed—June 30th, 1989.

ORDER MADE UNDER THE ENVIRONMENTAL ASSESSMENT ACT

EXEMPTION—MINISTRY OF GOVERNMENT SERVICES—MGS-99

Having received a request from the Ministry of Government Services that an undertaking, namely:

The activity of planning for a mixture of land uses including housing and government accommodation under the process of the *Planning Act, 1983*, and the implementation of the plans on a site of about sixty acres in area owned by the Board of Governors of the Humber College of Applied Arts and Technology ("Humber College") and Her Majesty the Queen in Right of Ontario as represented by the Minister of Government Services, being portions of lots 5 and 6, in the Broken Front Concession Fronting the Lake, in the City of Etobicoke (the "Site"),

be exempt from the application of the Act pursuant to section 29; and

Having been advised by the Ministry of Government Services that if the undertaking is subject to the application of the Act, the following injury, damage or interference with the persons and property indicated will occur:

- A. The people of Ontario will be interfered with and damaged by the delay required to prepare an environmental assessment for an activity which will provide affordable housing.
- B. The people of Ontario will be interfered with and damaged by the delay in providing affordable housing which would result if an environmental assessment were to be prepared for an activity for which adverse environmental impacts have not been identified from the concept plans.

Having weighed such injury, damage or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

- A. The proposed undertaking has been initiated in partial fulfilment of the "Housing First" policy, under which provincially-owned lands that are surplus to the program needs of government are used to provide affordable housing.
- B. The undertaking does not include the activity of lakefilling, which is regulated under the approval dated December 3, 1980, issued by the Environmental Assessment Board to the Metropolitan Toronto and Region Conservation Authority.
- C. The process of planning the undertaking will be subject to public meetings and input pursuant to the *Planning Act, 1983*.

This exemption is subject to the following terms and conditions:

- 1. The Ministry of Government Services and Humber College shall retain the services of an environmental consultant to prepare an Environmental Management Master Plan for the site, addressing parkland requirements, public access, public use and recreation as specified in the Development Plan; storm water management, soil management, impact on aquatic habitat, noise; the design and construction of the development including measures to achieve efficient use of energy and facilitate waste reduction and recycling; and any other environmental matters which may arise during and after construction. The Environmental Management Master Plan shall be submitted to the City of Etobicoke as part of the supporting material for any request for an amendment to the Eto-

bicoke Official Plan or any other approvals as appropriate.

2. Terms of Reference for the Environmental Management Master Plan must be prepared by the Ministry of Government Services and be circulated for comments to the Ministry of the Environment, Metropolitan Toronto and Region Conservation Authority, all other affected government agencies and the public who have indicated interest in the proposed undertaking. The Terms of Reference shall establish a consultation procedure including a liaison committee for the preparation of the Environmental Management Master Plan. The liaison committee shall include representatives from such of the following as wish to participate: Ministry of the Environment, other affected Ministries, City of Etobicoke, Humber College, Metropolitan Toronto and Region Conservation Authority and representative resident's groups.

3. The Ministry of Government Services and Humber College shall implement or ensure implementation of the Environmental Management Master Plan, as amended from time to time, in connection with the amendment of an official plan or the making of a zoning by-law or an approval under any other section of the *Planning Act*.

4. The Ministry of Government Services and Humber College shall retain the services of an environmental consultant to ensure that the provisions of the Environmental Management Master Plan required to be followed by the Ministry and Humber College under the previous condition are in fact complied with and the on-site environmental consultant shall report any deviation from those provisions to the City of Etobicoke.

5. Where any activity which otherwise would be exempt under this order is being carried out as or is part of an undertaking for which an environmental assessment has been accepted and approval to proceed received, the activity shall be carried out in accordance with any terms or conditions in the approval to proceed as well as the conditions of this order.

6. Where any activity which is the subject of this order is being carried out as or is part of another undertaking which is the subject of an exemption order under the Act, the activity exempt under this order shall be carried out in accordance with any terms or conditions in the other exemption order as well as the conditions in this order.

7. The undertaking exempted by this order does not include any lakefilling activities and any such activities associated with the under-

taking may only take place in accordance with approvals under the Act.

8. This order shall expire if construction has not commenced by December 31, 1993.

(3) This Regulation is a Sectoral Effluent Monitoring Regulation within the meaning of the General Effluent Monitoring Regulation.

(4) Each direct discharger shall carry out the monitoring obligations, including the sampling, analysis, toxicity testing, flow measurement, recording and reporting obligations of this Regulation, in accordance with the General Effluent Monitoring Regulation and in accordance with the sampling principles specified in Schedule BB to this Regulation and the analytical principles specified in Schedule CC to this Regulation.

(5) Each direct discharger shall carry out the monitoring obligations of this Regulation using the analytical method detection limits specified in Column 6 of

Schedule 3 to the General Effluent Monitoring Regulation and in Column 6 of Schedule CC to this Regulation.

(6) Each direct discharger shall carry out the sampling and analytical obligations in relation to boron, strontium, biphenyl and diphenyl ether in accordance with Notes A to D to Schedule AA.

(7) An obligation on a direct discharger to do a thing under this Regulation is discharged if another person has done it on the direct discharger's behalf.

(8) Sections 4 to 16 cease to apply in respect of a sampling point of a direct discharger where an approval is granted under subsection 24 (1) of the *Ontario Water Resources Act*,

- (a) to route the effluent stream on which the sampling point is established to a sewage works; or
- (b) to eliminate the effluent stream on which the sampling point is established. O. Reg. 395/89, s. 3.

SAMPLING POINTS

4.—(1) Each direct discharger shall, by the 1st day of September, 1989, establish a sampling point on each effluent stream named in the site-specific monitoring schedule for that discharger's plant as follows:

1. A batch discharge sampling point on each batch discharge effluent stream.
2. A combined effluent sampling point on each combined effluent stream.
3. A final discharge sampling point on each process effluent, combined effluent or batch discharge effluent stream.
4. A once-through cooling water sampling point on each once-through cooling water effluent stream.
5. A process effluent sampling point on each process effluent stream.
6. A storm water sampling point on each storm water effluent stream.
7. A waste disposal site effluent sampling point on each waste disposal site effluent stream.
8. An emergency overflow effluent sampling point on each emergency overflow effluent stream.

(2) Each direct discharger shall use the sampling points established under subsection (1) for all sampling required by this Regulation, except that a direct discharger may use alternate sampling points where that is acceptable to the Director.

(3) Where there is continuity of flow among a process effluent, combined effluent or batch discharge effluent stream of a direct discharger, that direct discharger shall collect all samples required by sections 5, 7, 8 and 9 in respect of those particular streams on the same day, to the extent that the coincidence or overlap of frequency requirements specified in the site-specific monitoring schedule for that discharger's plant permits.

(4) Except as otherwise specifically provided, sets of samples required to be collected under this Regulation need not be collected on the same day.

(5) Each direct discharger shall collect each sample required to be collected from a process or combined effluent sampling point as a composite sample

throughout an operating day in accordance with subsection 3 (4) of the General Effluent Monitoring Regulation.

(6) Each direct discharger shall submit for analysis the sample volume for each analytical test group that is required by the laboratory to meet the analytical method detection limits specified in Column 6 in Parts A and B of Schedule 3 to the General Effluent Monitoring Regulation.

(7) Each direct discharger carrying out the requirements of subsection (6) need not comply with subsection 3 (23) of the General Effluent Monitoring Regulation. O. Reg. 395/89, s. 4.

CHARACTERIZATION

5.—(1) Each direct discharger shall collect a set of samples sufficient to perform all of the characterization and open characterization required by subsections (4), (6) and (7) from each process effluent, combined effluent and batch discharge effluent sampling point of that discharger,

- (a) at the characterization sampling frequencies and minimum intervals specified in the site-specific monitoring schedule for that discharger's plant; and
- (b) once within thirty days after every process change that is expected to significantly and adversely affect the quality of effluent at the sampling point.

(2) For the purpose of subsection 4 (3) of the General Effluent Monitoring Regulation, samples collected under subsection (1) are collected for characterization.

(3) Clause (1) (b) does not apply to experimental process changes of less than thirty days in duration.

(4) Each direct discharger shall analyze each set of samples collected under clauses (1) (a) and (b) for all of the parameters in Column 2 of Schedule AA.

(5) Each direct discharger shall collect all samples required by clause (1) (a) on the same day, except to the extent that this is impossible because of a lack of coincidence or overlap of frequency requirements specified in the site-specific monitoring schedule for that discharger's plant for characterization sampling for analytical test group 24, with frequency requirements specified in that schedule for characterization sampling for all other analytical test groups.

(6) Despite subsection (4), where the characterization sampling frequencies specified in the site-specific monitoring schedule for a direct discharger's plant require characterization sampling for all analytical test groups other than analytical test group 24 on a day on which characterization sampling for analytical test group 24 is not required by that schedule, the samples

collected under clause (1) (a) on that day need not be analyzed for analytical test group 24.

(7) Each direct discharger shall perform an open characterization on each set of samples collected under clause (1) (a).

(8) A direct discharger is only required to fulfil the requirements of clause (1) (a) throughout four consecutive quarters. O. Reg. 395/89, s. 5.

DAILY MONITORING

6.—(1) Subject to subsection (2), at each final discharge sampling point, each direct discharger shall,

- (a) continuously sample and analyze, using an on-line analyzer, for the parameters in analytical test groups 3 and 7 in Schedule AA; or
- (b) during each operating day, collect a set of samples and analyze those samples for the parameters specified in clause (a).

(2) If a direct discharger is unable to carry out the requirements of subsection (1) at a final discharge sampling point, that discharger shall instead carry out those requirements at each sampling point on each effluent stream that flows into the stream on which the final discharge sampling point is located, and shall analyze those samples for the parameters specified in clause (1) (a).

(3) During each operating day, each direct discharger shall collect a set of samples from each process effluent, combined effluent and batch discharge effluent sampling point of that discharger, and shall analyze each such set for the parameters indicated in the daily column, for the stream from which the set was collected, of the site-specific monitoring schedule for that discharger's plant.

(4) When on an operating day a set of samples is collected under subsection (3) from a sampling point in respect of which a collection or analysis was performed on the same day under subsection (1) or (2), the direct discharger need not analyze the set of samples for parameters for which an analysis was performed under subsection (1) or (2).

(5) Clause (1) (b) and subsections (2) and (3) do not apply in respect of any day on which a sufficient volume of sample cannot be collected because of the collection of inspection samples. O. Reg. 395/89, s. 6.

THRICE-WEEKLY MONITORING

7. On at least three operating days in each week, each direct discharger shall collect a set of samples from each process effluent, combined effluent and batch discharge effluent sampling point of that discharger and shall analyze each such set for the parameters indicated in the thrice-weekly column, for the stream from which the set was collected, of the site-

QUALITY CONTROL MONITORING

14.—(1) Each direct discharger shall prepare each travelling spiked blank sample required to be analyzed by this section with a standard solution containing at least the parameters to be analyzed for, and shall record the concentration of each such parameter.

(2) For the purposes of subsections (3) and (4), where a direct discharger collects a composite sample using an automatic composite sampling device, the discharger may, instead of collecting a duplicate sample, remove an aliquot from each sample container used to collect the sample, in which case the direct discharger shall analyze the aliquots as if they were duplicate samples.

(3) Once in each month, on a day on which samples are collected under section 9, each direct discharger shall collect a duplicate sample for each sample required to be collected on that day by sections 6 and 7 from the stream indicated as requiring quality control monitoring in the site-specific monitoring schedule for that discharger's plant and shall analyze the set of duplicate samples for the parameters indicated in the daily and thrice-weekly columns, for the stream from which the set was collected, of that site-specific monitoring schedule.

O. Reg. 395/89, s. 14.

TOXICITY TESTING

15.—(1) Each direct discharger shall collect a sample from each final discharge sampling point of that discharger once in each month on the same day as the set of samples is collected under section 9 from that sampling point and shall perform thereon a fish toxicity test.

(2) If the tests performed under subsection (1) on all samples from a final discharge sampling point in three consecutive months result in mortality for no more than two out of ten fish at all effluent concentrations, a direct discharger may thereafter perform the tests required by subsection (1), on the samples from that sampling point, on 100 per cent undiluted samples only.

(3) If a test performed under subsection (2) on any sample from a final discharge sampling point results in mortality for more than two out of ten fish, subsection (2) ceases to apply and continues not to apply in respect of samples from that sampling point, until the tests performed under subsection (1) on all samples

from that sampling point in a further three consecutive months result in mortality for no more than two out of ten fish at all effluent concentrations.

(4) Each direct discharger shall collect a sample from each final discharge sampling point of that discharger once in each month, on the same day as the sample is collected under subsection (1) from that sampling point and shall perform thereon a *Daphnia magna* acute lethality toxicity test.

(8) If a test performed under subsection (7) on any sample from a once-through cooling water sampling point results in mortality for more than two out of ten test species, subsection (7) ceases to apply in respect of samples from that sampling point.

(3) Where the flow of a process effluent or combined effluent stream cannot be continuously measured on any operating day because of equipment mal-

function and all reasonable care has been taken to avoid and correct the malfunction, the direct discharger may fulfil the requirement of subsection (1) by estimating the total volume of effluent discharged on that day from that stream and recording that estimate.

(4) Each direct discharger shall, at the time of each sampling under this Regulation from a batch discharge or once-through cooling water effluent stream of that discharger, measure or estimate the flow of that stream at a location or set of locations representative of the flow at the sampling point established for that stream and shall record the measured or estimated data.

(5) Each direct discharger shall measure or estimate the duration and approximate volume of every storm water discharge, waste disposal site effluent discharge and emergency overflow in respect of which the discharger has taken a sample under this Regulation and shall record the measured or estimated data.

(7) Subject to subsection (8), each direct discharger shall demonstrate by calibration, performed no earlier than 365 days before the filing of this Regulation and no later than thirty days before the first use of the device for the purposes of this Regulation, that each primary flow measuring device used to measure the flow of any process effluent stream for the purposes of this Regulation, meets the accuracy requirement of subsection 6 (1) of the General Effluent Monitoring Regulation.

(8) Where a direct discharger demonstrates to the Director by means of a certified report of a registered professional engineer of the Province of Ontario that a primary flow measuring device has been designed and installed in accordance with the standards of a national or international standards setting organization, that primary device will be deemed capable of meeting the accuracy requirement of subsection 6 (1) of the General Effluent Monitoring Regulation.

(9) Subject to subsection (10), each direct discharger shall demonstrate by calibration, performed no earlier than 365 days before the filing of this Regulation and no later than thirty days before the first use of the device for the purposes of this Regulation, that each flow measuring device used to measure the flow of any combined effluent stream for the purposes of this Regulation, meets the accuracy requirement of subsection 6 (3) of the General Effluent Monitoring Regulation.

(10) Where a direct discharger demonstrates to the Director by means of a certified report of a registered professional engineer of the Province of Ontario that a flow measuring device has been designed and installed in accordance with the standards of a national or international standards setting organization, that flow measuring device will be deemed capable of meeting

the accuracy requirement of subsection 6 (3) of the General Effluent Monitoring Regulation. O. Reg. 395/89, s. 16.

(17) Each direct discharger shall submit to the Director a description of any methods, devices and calculations used in estimating the volume of a discharge of effluent under subsection 16 (3), together with an assessment of the accuracy of those methods,

devices and calculations, within sixty days after each such estimation.

(18) Each direct discharger shall report to the Director the information required to be recorded under subsection 16 (5), as well as the date and location of each discharge and overflow measured or estimated under subsection 16 (5).

(19) Each direct discharger shall report in writing to the Director the date, approximate duration and amount of rainfall of each storm event that occurs while section 11 is in force, within sixty days after each such storm event.

(20) Each direct discharger shall submit to the Director, at least thirty days before the collection of the first sample in each month, a schedule of sampling dates and times by sampling point location for all sampling to be done under sections 5, 9 and 10.

(21) Each direct discharger shall make every reasonable effort to follow the schedule submitted by the direct discharger under subsection (20) but, if the schedule cannot be followed as submitted, the direct discharger shall notify the Director promptly of any change in dates or times.

(22) Within thirty days after the end of each quarter, each direct discharger shall submit a report to the Director stating the quantities of chemicals added to each once-through cooling water effluent stream of that discharger in the quarter, and stating the dates on which these additions occurred.

(23) Each direct discharger shall, no later than the 31st day of December, 1990, submit a report to the Director describing the variation in daily flow for a period of six months for each process effluent stream from which samples are collected under this Regulation other than by means described in clauses 3 (4) (a), (b) and (e) of the General Effluent Monitoring Regulation.

(24) The report referred to in subsection (23) shall include the raw data and calculation methods used to produce the report.

(25) Each direct discharger shall keep records of all sampling required by this Regulation, including, for each sample, the date and time of collection, the sampling procedures used, the amount of sample dilution by preservative if dilution exceeds 1 per cent and any incident likely to affect an analytical result.

(26) Each direct discharger shall develop a maintenance schedule for all sampling equipment and shall record the dates on which any maintenance action was taken, together with a description of the action.

(27) Each direct discharger shall keep records of all analytical methods used in meeting the requirements of this Regulation.

(28) Each direct discharger shall submit a report to the Director detailing the date, duration and cause of each sampling, toxicity testing, analytical and flow measurement malfunction or other problem that interferes with fulfilling the requirements of this Regulation, together with a description of any remedial action taken, within sixty days after the day on which the malfunction or problem occurs.

(29) Each direct discharger shall keep all records and reports required by this Regulation to be kept or made for a period of two years following the date of the last report submitted to the Director under this section. O. Reg. 395/89, s. 17.

COMMENCEMENT

18.—(1) This Regulation, except sections 5 to 15 and subsections 16 (1) to (6), comes into force on the day on which it is filed.

(2) Sections 5 to 15 and subsections 16 (1) to (6) come into force on the 1st day of December, 1989.

REVOCATION

19. Sections 5 and 7 to 15 are revoked on the 1st day of December, 1990.

MOTOR VEHICLE TRANSPORT ACT, 1987

MOTOR VEHICLE TRANSPORT ACT, 1987, PART II TRUCK APPLICATIONS:

The following are applications for extra-provincial truck transport operating licences under Part II of the Motor Vehicle Transport Act, 1987, S.C. 1987, Chapter 35. These Applicants have been found to meet the fitness requirements pursuant to Section 8(2) of that Act and the provincial transport board for Ontario proposes to issue the licences if no objection is served on the Applicant and filed with the Registrar of Motor Vehicles with the prescribed filing fee, within twenty-nine days of this publication.

EXTRA-PROVINCIAL APPLICATIONS:

NOTE: Where the application is for a licence other than a corridor operating authority, an interested person who serves and files an objection must also provide the Ontario Highway Transport Board with written evidence, within thirty-nine days of this publication that satisfies that Board that, in the absence of evidence to the contrary, the operation of the undertaking in respect of which the licence is sought would likely be detrimental to the public interest.

* Indicates a person who has applied for licences under both Part II and Part III of the Motor Vehicle Transport Act, 1987.

MOTOR VEHICLE TRANSPORT ACT, 1987

INTRA-PROVINCIAL TRUCK APPLICATIONS:

The following are applications for operating licences under Part III of the Motor Vehicle Transport Act, 1987, S.C. 1987, Chapter 35. These applicants have been found to meet the fitness requirement in like manner to section 6 of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64, and the provincial transport board for Ontario proposes to issue the licences unless a person, within thirty days of this publication, serves on the Applicant and files with the Registrar of Motor Vehicles with the prescribed filing fee, a written request for a fitness hearing or a public interest test in like manner to Subsection 7(4) of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64.

NOTE: A person who requests a public interest hearing must, within thirty-nine days of this publication, serve on the Ontario Highway Transport Board a document that makes out a written case to the Board that the granting of the operating authority applied for would be likely to have a significant detrimental effect on the public interest using the criteria set out in subsection 10(1) of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64, and that the request is not frivolously made.

* Indicates a person who has applied for licences under both Part II and Part III of the Motor Vehicle Transport Act, 1987.

PART II TRUCK APPLICATIONS:

The Applicants listed herein have applied for licences to operate an extra-provincial truck undertaking under Part II of the Motor Vehicle Transport Act, 1987. The Applications were published in the Ontario Gazettes of **April 9, 1988, October 29, 1988, February 25, 1989, April 1, 1989, April 22, 1989 and May 13, 1989.**

Notices of Objection and written evidence were filed on these applications, within the time prescribed, by interested persons. The Ontario Highway Transport Board has considered the evidence filed and is satisfied that in the absence of evidence to the contrary the operation of the extra-provincial truck undertaking in respect of which the licences are sought would likely be detrimental to the public interest.

Accordingly, the Board has directed that public hearings be held at the Board's Chambers, Britannica House, 151 Bloor Street West, 10th Floor, Toronto, Ontario as indicated hereunder:

For further information with respect to these hearings, members of the public are advised to contact the Secretary of the Board.

MOTOR VEHICLE TRANSPORT ACT, 1987

INTRA-PROVINCIAL TRUCK APPLICATIONS:

The following are applications for operating licences under Part III of the Motor Vehicle Transport Act, 1987, S.C. 1987, Chapter 35. These applicants have been found to meet the fitness requirement in like manner to section 6 of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64, and the provincial transport board for Ontario proposes to issue the licences unless a person, within thirty days of this publication, serves on the Applicant and files with the Registrar of Motor Vehicles with the prescribed filing fee, a written request for a fitness hearing or a public interest test in like manner to Subsection 7(4) of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64.

NOTE: A person who requests a public interest hearing must, within thirty-nine days of this publication, serve on the Ontario Highway Transport Board a document that makes out a written case to the Board that the granting of the operating authority applied for would be likely to have a significant detrimental effect on the public interest using the criteria set out in subsection 10(1) of the Truck Transportation Act, 1988, S.O. 1988, Chapter 64, and that the request is not frivolously made.

* Indicates a person who has applied for licences under both Part II and Part III of the Motor Vehicle Transport Act, 1987.

ENVIRONMENTAL ASSESSMENT ACT

O. Reg. 409/89.

Exemption—Ontario Hydro—OH-13/3.

Made—June 30th, 1989.

Approved—June 30th, 1989.

Filed—July 11th, 1989.

ORDER MADE UNDER THE ENVIRONMENTAL ASSESSMENT ACT

EXEMPTION—ONTARIO HYDRO—OH-13/3

Having received a request from Ontario Hydro that an exemption order, OH-13/2, be extended beyond the November 7, 1988 termination date so that an undertaking, namely:

The program of planning, designing, upgrading, replacing, constructing, operating and maintaining,

- (a) combustion turbine and diesel generator facilities at existing sites to cover emergency situations and/or a predicted shortage of generating capacity, and
- (b) heat recovery systems to be retrofitted on existing combustion turbine and diesel generator units to permit the recovery of by-product heat energy which, otherwise would be rejected to the atmosphere,

be exempt from the application of the Act pursuant to section 29; and

Having been advised that if the undertaking is subject to the application of the Act the following injury, damage or interference with the persons and property indicated will occur:

- A. The public will be interfered with by the delay in installing,
 - (i) generating capacity which is required to maintain an adequate power supply, or
 - (ii) by-product heat recovery systems which will normally displace the use of more expensive, non-renewable fuels.

- B. Ontario Hydro will be interfered with and damaged by the undue delay and expense required to prepare individual environmental assessments for projects that are urgent, primarily of a minor nature and have no significant adverse consequences on the environment; and

Having weighed such injury, damage or interference with the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

- A. The undertaking is unlikely to have any significant adverse effects on the environment and therefore the interference with Ontario Hydro generation and waste heat recovery programs which would be caused by the application of the Act would be undue.
- B. The installation of new combustion turbine and diesel generator units and the addition of heat recovery systems to old units is subject to review and approval under the *Environmental Protection Act*.

This exemption is subject to the following terms and conditions:

1. This exemption order replaces Exemption Order OH-13/2, which is hereby terminated.
2. Where any activity which otherwise would be exempt under this order is being carried out as or is part of an undertaking for which an environmental assessment has been accepted and approval to proceed received, the activity shall be carried out in accordance with any terms or conditions in the approval to proceed.
3. This order does not apply to combustion turbine and diesel generator units which are proposed to use any fuel derived from waste.
4. This order shall terminate on the later of:

- (a) five years from the approval date of this exemption order, or
- (b) such later date as the Minister of the Environment may specify by notice in writing to the proponent and published in *The Ontario Gazette*.

Having been advised by the Town of Cobourg that if the undertaking is subject to the application of the Act, the following injury, damage or interference with the persons and property indicated will occur:

- A. The Town has limited disposal capacity remaining under the current Emergency Certificate of Approval No. A311702 issued to the Town of Cobourg on January 6, 1988 and undue delay in implementing an interim expansion would not be in the best interests of the municipality. The development of a long term waste management strategy has been undertaken by the Town.
- B. Other available interim waste management options are not suitable or will result in a significant increase in waste disposal costs.

Having weighed such injury, damage or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

- A. The expansion of existing fill contours at the existing landfill site is clearly an interim measure for which there are no other reasonable waste management alternatives which can be implemented within the necessary time frame.
- B. The proposal to increase the existing fill contours of the Cobourg Landfill Site is not a major undertaking. The waste disposal site has been in operation since 1958 and is an established and accepted land use. Interim

alternatives which have been evaluated include waste incineration and waste transport to an alternate site. It was concluded by the Town of Cobourg that these alternative options are not suitable as an interim solution.

- C. The existing Landfill Site is operating under Emergency Certificate of Approval No. A311702 and the interim expansion of the Cobourg Landfill Site is subject to the requirements of the *Environmental Protection Act*. An application has been made to the Ministry of the Environment to amend Emergency Certificate of Approval No. A311702 under Part V of the *Environmental Protection Act*. Pursuant to this, a public hearing is underway. This hearing will give local residents the opportunity to provide input to the Environmental Assessment Board on the technical aspects of this proposal.
- D. No useful purpose would be served by conducting an environmental assessment or further hearings under the *Environmental Assessment Act* on the suitability of the Cobourg Landfill Site for landfill purposes. The Town of Cobourg has initiated a long-term waste management strategy and is a participant in the development of the Northumberland County Solid Waste Master Plan, which is expected to take approximately four years. This Solid Waste Master Plan will be implemented in accordance with the *Environmental Assessment Act*.
- E. The interim expansion and operation of the Cobourg Landfill Site would be subject to the terms and conditions of this Order.

This exemption order is subject to the following terms and conditions:

1. That this Exemption Order does not imply that an exemption will be granted to other ancillary or related activities.
2. Where any activity which otherwise would be exempt under this order is being carried out as or is part of an undertaking for which an environmental assessment has been accepted and approval to proceed received, the activity shall be carried out in accordance with any terms or conditions in the approval to proceed as well as the conditions of this order.
3. Where any activity which is the subject of this order is being carried out as or is part of another undertaking which is the subject of an exemption order under the Act, the activity exempt under this order shall be carried out in accordance with any terms or conditions in the other exemption order as well as the conditions in this order.

4. No waste shall be deposited at the site pursuant to this order more than five years after the date of any Provisional Certificate of Approval or Certificate of Approval issued for the purpose of this order, or after approved landfill contour limits for the site are reached, whichever should occur first.
